

Team Name: sddec21-16

Team Members:

- Dylan Black
- Andy Dugan
- Zhi Wang
- Jack Phillips
- Jacob Abkes

Report Period: March 28 - April 12th

Summary of Progress in this Period

1. Decided on React as our front-end framework due to it being simpler to learn than Angular
 2. Set up React and Node.js to work on our server
 3. Established our development patterns and wrote up instructions for running the app locally, and deploying it on the server
 4. Decided upon React-Bootstrap as a front-end framework

Pending Issues

- 1.
-

Plans for Upcoming Reporting Period

1. Setup connection between backend (Node.js) and frontend (Angular/React)
 2. Develop a few demonstrable webpages
 - a. Threat model submission page
 - b. Search results page
 - c. Threat model data page (content fetched from database)
 - d. Homepage
 3. Connect database to our new backend and enable threat model submission.
 4. Develop a basic search for fetching and sorting through previously-submitted threat models.
