

Team Name: sddec21-16

Team Members:

- Dylan Black
- Andy Dugan
- Zhi Wang
- Jack Phillips
- Jacob Abkes

Report Period: April 12th - April 26th

---

Summary of Progress in this Period

1. Setup connection between backend (Node.js) and frontend (Angular/React)
  2. Connect MySQL database to Node.js backend and enable threat model submission
  3. POST/GET method is working now
  4. Threat model submission page is at <http://sddec21-16.ece.iastate.edu/post>
  5. Threat model data page (content fetched from database) is the homepage <http://sddec21-16.ece.iastate.edu/>
  6. Backend search functionality completed
  7. Finished design document version 3
  8. Final project presentation
  9. Setup the team website <https://sddec21-16.sd.ece.iastate.edu/>
- 

Pending Issues

1. Refinement of user interface
  2. Waiting for feedback from project advisor about deliverable 1
- 

Plans for Upcoming Reporting Period

1. Get ready for the deliverable 2, explore how to do search and text-mining in our database
  2. Complete front-end component for search functionality
  3. Gather requirements related to integration of text-mining
-
